Respected Madam,

Greetings of the season!

Hope you are in high spirits and I wish you success in all your endeavours.

Madam, I've taken over the charge as President, IIISLA on 27/12/2021. Immediately after assuming the office, I'm flooded with the concern of IIISLA Members about Non Generation of Surveyor's Code after clearing SMP interviews. There are hundreds of applications lying pending for generation of Surveyor Code and the new surveyors are lurching in dark making rounds to their respective BOs, DOs & ROs.

I'm very much disappointed that the new surveyors are unable to start their career after clearing surveyors exams and SMP interviews. It's been a bane for the starters to keep waiting for more than a year for Code Generation and then to start working.

Since Surveyors Code Generation is done at H.O. Level, therefore I request your good self to instruct the concerned department to clear all the pending applications and oblige.

I would humbly submit here that an order be passed for Surveyors Code Generation at the time of publishing the name of successful applicants of SMP interview list. This shall reduce the delay and the new surveyors shall be able to render their services immediately.

Your good self shall appreciate that by inducing more eligible and efficient young brigade surveyors, TAT of report submission can be reduced drastically. This is the only way I find for a quick solution to serve the insured.

I request an immediate action in this regard & seek an appointment with you to introduce my Team IIISLA to share our objectives to serve the Insured in an efficient manner. Hoping for a kind response from your side.

Best regards and wishes for healthy year ahead.

Lalit Gupta  
President (IIISLA)
