Dear Honorable Members,

At the outset we would like to update the members in the matter of " Revision of survey fees and " Automated surveyor appointment system" of OICL , following mail communication is self explanatory .

Dear sir

Hope you are safe and Healthy

We would like to inform you that recently the OICL has initiated an automated surveyor deputation system of surveyors by a software in the motor department. It has come to our notice that through the software, deputation is being done in an arbitrary manner without any rationale. This software does not take care of expertise, experience and technical aspects of motor survey and deposes surveyor randomly, thereby there is no proper job rotation amongst the empanelled surveyors.

It has also come to our notice that it does not take care of feedback responses from the surveyors in respect of job assignment. The main technical glitch of the software is that it fails in allotting surveyor jobs in rotation to empanelled surveyors. This type of erroneous technical glitch is also experienced in different regions of the company where this software is in operation.

Dear sir,

Hope you are healthy and safe.

As you are aware that survey fees revision is pending since long time. However a meeting was called of all four PSUs General manager (motor portfolio) on 19.03.2021 and thankfully we were also called for that VC meeting and our proposal for revision survey fees revision with inputs from others were considered and finalized.

At the outset , it's learnt that last month end non motor survey fees revision was akso discussed and finalized .

We are waiting for the Revision of survey fees to be published by GIPSA , it's our humble request to look into the matter and expedite the revision.

We hope going by our long standing relationship you would consider our request and support us.

Thanks and regards

Er Rahul Jadhav

We had meetings with concerned authorities and results will appear soon.

We are sincerely trying to resolve the issues for the fraternity inspite of several hurdles being created by our own few politically motivated members ,let's ignore them proceed further with honest efforts

With best regards

Er Rahul Jadhav
